Night of the Howling Dogs by Graham Salisbury

On the Big Island of Hawaii, Dylan's Scout troop hikes down into the desolation of an ancient lava flow to camp on a small beach below the volcano. It's beautiful. Peaceful. But there's a problem: Louie Domingo. He and Dylan share a secret history, and it lies like a shark beneath the surface of everything they do.

...Until the world comes apart.

Foreshadowed by two mysterious howling dogs, a disaster of unearthly proportions strikes. No one is spared its horror. But over the next hours Dylan learns the true meaning of leadership and the will to survive. More amazing still is that this story actually happened.
